Norfatin Hazirah Mohd Idris

MECHANICAL ENGINEERING GRADUATE

Johor Bahru, Johor | (+60) 14-6887244
norfatinhazirahmohdidris@yahoo.com

Website

Summary

Mechanical Engineering graduate with a strong foundation in technical documentation, process accuracy, and hands-on project experience. Eager to apply technical knowledge and organisational skills in a professional environment that values accuracy, teamwork, and continuous learning. Skilled in technical reporting, process documentation, and cross-department collaboration. Open to diverse opportunities that allow growth and contribution to meaningful work.

Education

TalentLabs K-Youth Development Programme, UX Design **Nov 2025**

- Training in UX principles, web development, presentation, and data visualization.

Universiti Teknologi Malaysia (MJIIT), Bachelor in Mechanical Precision Engineering **Mar 2025**

- **Final Year Project:** *Underwater Colour Correction for Enhanced Object Detection* – Developed and determined algorithms to improve underwater image accuracy for object detection.
- CGPA : 3.12 / 4.00

Politeknik Ibrahim Sultan, Diploma in Mechanical Engineering **Jan 2021**

- **Final Year Project:** *Escalera Estable* – Designed an ergonomic ladder with levelling and safety features for use on edges and uneven surfaces.
- CGPA : 3.75 / 4.00

Certification

SIRIM Six Sigma Green Belt Certification

Experience

VS Industry Sdn. Bhd | Quality Engineering Intern **Jul 2024 – Oct 2024**

- Monitored production and inspection processes to ensure compliance with GD&T specifications and manufacturing quality standards.
- Prepared detailed quality and process reports using Microsoft Dynamics SL with 99% accuracy.
- Supported ISO 9001:2015 documentation, audit preparation and non-conformance investigations.
- Collaborated with engineers to investigate non-conformances and implement corrective actions.

Texas Instruments Electronics Malaysia | Technician Intern **Mar 2021 – Jul 2021**

- Conducted preventive maintenance on 40+ die-attach machines, reducing downtime by 20%.
- Supported new product setup activities, improving production line efficiency by 15%.
- Collected and documented process data to support engineering analysis and maintenance optimisation.

Skills

- **Engineering :** Manufacturing Processes, Mechanical Design, Quality Control, Preventive Maintenance, GD&T, Lean Six Sigma, 5S Methodology
- **Software & Tools :** AutoCAD, Fusion 360, Autodesk Inventor, C++, Google Analytics, Tableau, Microsoft Dynamics SL, Microsoft Office Suite
- **Quality & Process :** ISO 9001:2015 Documentation Support, Continuous Improvement
- **Design & Research :** UX/UI Design, User Research

Extra-curricular Activities

Mechanical Precision Engineering Association (PREMECH) 22/23 & 23/24

- Promoted from Entrepreneurship Officer to Vice President in recognition of leadership and organisational performance.
- Led planning and execution of technical workshops and faculty events for engineering students.
- Coordinated cross-functional teams covering logistics, sponsorship, publicity, and technical preparation to ensure smooth event operations and timeline adherence.
- Managed sponsorship engagement and external communications with industry partners.

SAEM INTERNATIONAL INNOVATION EXHIBITION 2023 (SAEMIIE)

- Acted as Sponsorship Committee Member
- Assisted in securing sponsorships and maintaining communication with corporate partners, enhancing negotiation and relationship management skills.
- Coordinated with internal committees to support funding requirements and partnership deliverables.
- Supported logistical planning and on-site operations to ensure successful event execution.

SAE Mindstorm Workshop 2023

- Acted as Special Task Committee Member
- Supported workshop planning, participant coordination, and registration management.
- Assisted in technical setup and operational preparation prior to event launch.
- Contributed to on-site event management to ensure smooth programme delivery.
