Summary

Mechanical Engineering graduate with hands-on experience in inspection, machine maintenance, and quality documentation during internships at top-tier manufacturing companies. Familiar with mechanical drawings, GD&T, and basic electronics through exposure to part inspections and equipment setup. Experienced in CAD software and eager to deepen knowledge in areas like control systems, robotics, and cross-disciplinary collaboration. Enthusiastic about applying engineering principles to practical, automation-focused projects—Ready to deliver immediate value in fast-paced engineering environments.

Experience

VS Industry Sdn. Bhd | Quality Engineering Intern **Jul 2024 – Oct 2024**

- Performed inspections on axles and metal rods using callipers and smartscopes based on mechanical drawings and GD&T specifications.
- Ensured defect rate remained below 2% across 150+ IQC inspections.
- Performed OQC checks on 40+ shipments; ensured 100% on-time delivery and zero complaints.
- Maintained accurate quality reports via Microsoft Dynamics SL with 99% data accuracy.
- Supported ISO 9001:2015 documentation and root cause analysis for non-conformities

Texas Instruments Electronics Malaysia | Technician Intern **Mar 2021 – Jul 2021**

- Inspected and maintained 40+ die-attach machines daily; reduced downtime by 20%.
- Installed machines for new packages by referring to wafer and part drawings, confirming visual alignment under a microscope.
- Set up 15+ machines for new products; improved production efficiency by 15%.
- Extended machine lifespan by assisting in the maintenance of 20+ components.

Education

Universiti Teknologi Malaysia (MJIIT), Bachelor in Mechanical Precision Engineering **Mar 2025**

- Vice President, Premech Student Society 2023/2024
- **Final Year Project:** *Underwater Colour Correction for Enhanced Object Detection* – Developed and determined algorithms for image processing and colour correction in underwater images, significantly improving object detection accuracy.

Politeknik Ibrahim Sultan, Diploma in Mechanical Engineering **Jan 2021**

- Head of Department's Award (every semester)
- **Final Year Project:** *Escalera Estable* – Ergonomic ladder with levelling and safety features for use on edges and uneven surfaces.
- CGPA : 3.75/4.00

Skills

AutoCAD, Fusion 360, Inventor, CAM, C++, Microsoft Office, Data Analysis, Quality Control, Mechanical Design, Manufacturing Processes, Lean Six Sigma, 5S, Root Cause Analysis, Digital Callipers, Smartscopes, Microsoft Dynamics SL.
